Technology Leadership in the Boardroom: Driving Trust and Value

2024 NACD Blue Ribbon Commission on Technology Leadership in the Boardroom: Driving Trust and Value

The promise of technology and data-driven innovation is now central to companies' growth strategies. Yet, the blistering pace of change and increased concerns about trust are complicating how boards govern the opportunities and risks created by transformative technologies. Six forces are driving the urgency for boards to govern technology with greater insight, oversight, and foresight.

NACD's 2024 Blue Ribbon Commission report, ***Technology Leadership in the Boardroom: Driving Trust and Value***, calls on boards to lead with more definition, strategic focus, and proactive engagement.

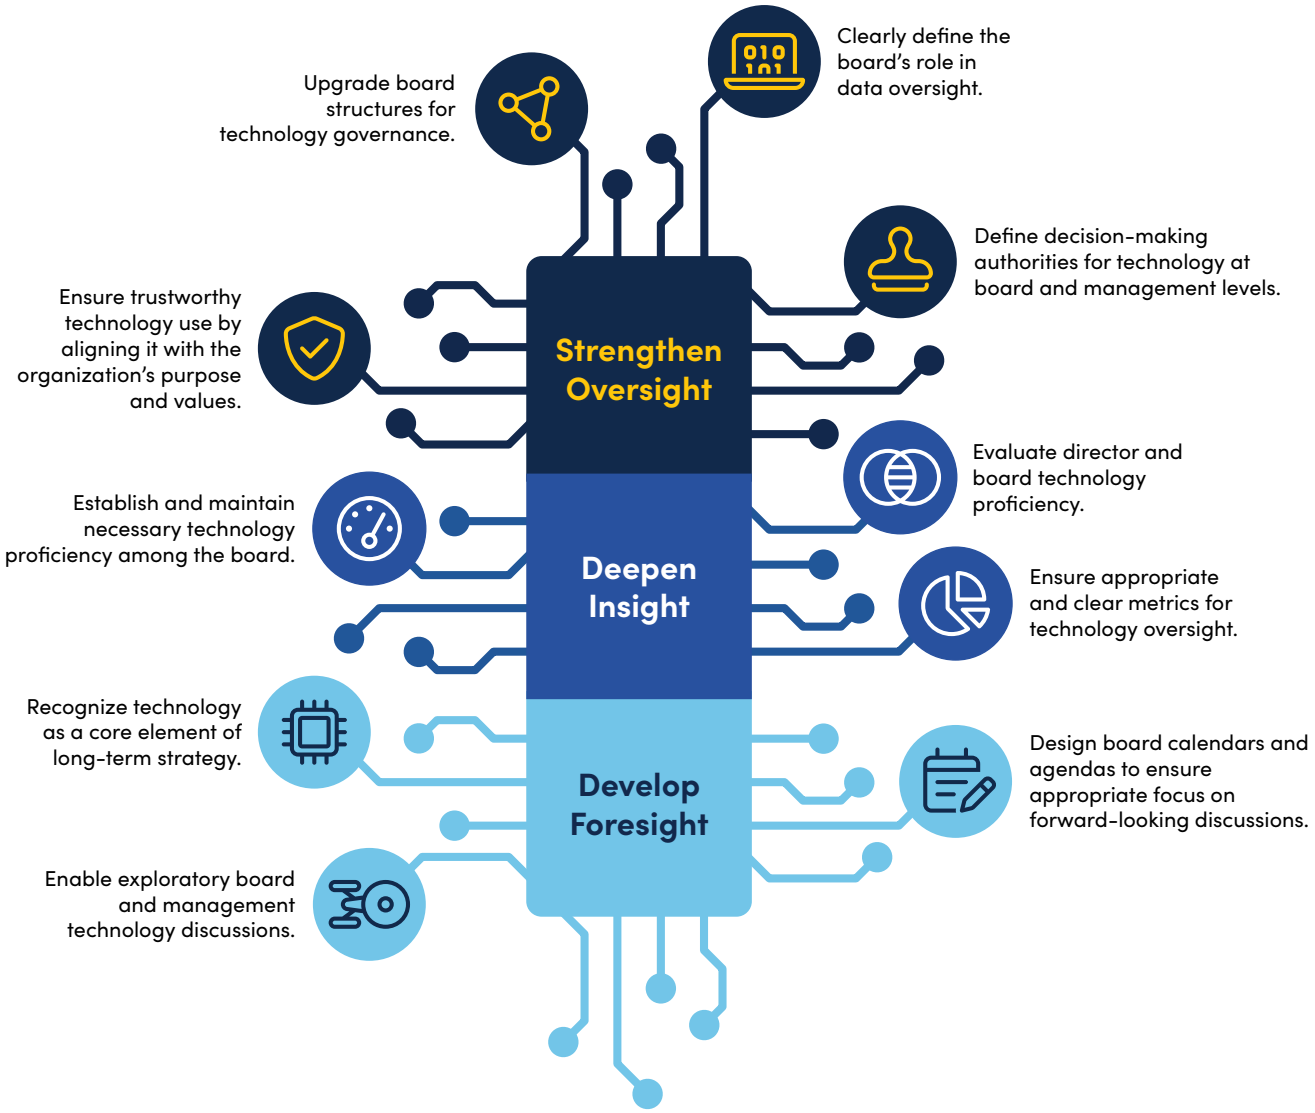
Technology Leadership in the Boardroom: Driving Trust and Value

Ten Recommendations for Technology Leadership in the Boardroom

Technology Leadership in the Boardroom: Driving Trust and Value introduces 10 solutions for boards seeking to capture the potential and manage the risk of emerging technologies.



About NACD Blue Ribbon Commission Reports

For more than 30 years, NACD's Blue Ribbon Commission reports have helped directors bridge the gap between governance practices and what's needed for the future. These reports help directors govern at the speed of business and enhance board effectiveness, including strengthening investor engagement, their partnership with the C-suite, and their relationships with policymakers.
